

**Your Partner for Electric and Light**

Richard Lesonitzky GmbH. partner of Kongresszentrum Hofburg BetriebsgesmbH.

**HOFBURG**

V I E N N A

**Dear Exhibitor!**

Ref: Electrical equipment for exhibition – power supply

The „Kongresszentrum Hofburg BetriebsgmbH“ in Vienna has asked us (Richard Lesonitzky GmbH) to send you an order form for the desired circuit lines, outlets as well as the desired lighting. We took care to make some packages of different power (ampere) for you. – Please choose as you need it/them! Each connection consists of the proportionate offshore net construction as well as specified switch with connection belonging to it and on loan, including assembly and dismantling. Perhaps there is a need of a booth-grounding if you have a metal stall as well as the report of results of the commission before you start your event. You have to submit the examination report to the „Magistrat of the City of Vienna“.

If you do some installations on your own, you have to carry out a booth-grounding separately and you also need a separate report result of the commission. Please be informed that we have to charge you for these costs, too. You also have the possibility to have your own material installed by us if it is corresponding to the standard. Please do not forget to order these services timely before the beginning of the event.

If you carry out the electrical installations for your stall on your own, we have to check the proper execution of your work according to the appropriate exhibition determinations in Austria (no matter how much connections you have within your stand).

In case that the electrical installations have been ordered by you or have been carried out by your own staff, this check passes the liability for your part to the „Kongresszentrum Hofburg BetriebsgmbH“ in Vienna. You guarantee that all this work was performed properly and carried out corresponding to the appropriate legal determinations. If this is not the case, the „Kongresszentrum Hofburg BetriebsgmbH“ in Vienna will charge you for all damages which will occur.

For Neonsystems (High voltage) you have to submit a certificate of the source unit which is a proof that the construction corresponds to the „OEVE – Instructions“. We will also have to charge you for the cost of electricity as following:

- costs during the installation
- costs during the event

Please take note that for our company and for the „Kongresszentrum Hofburg BetriebsgmbH“ in Vienna the person who is authorized to sign (this means who is authorized to place orders with us or the „Kongresszentrum Hofburg BetriebsgmbH“ in Vienna) has to be present during the installation and during the event at the stand or premises rented.

As already agreed in our contract, the payment has to be carried out after accounting, within 8 days, net, without any discounts. We reserve the right to require a bail in certain cases before the execution of the order. If there is a delay in payment, we will charge you for all costs which will arise from it (fine, collection costs, interest on arrears are 12% per anno as already agreed in our contract).

Jurisdiction and place of execution Vienna.

**Please do not forget to fill in the enclosed order form and eventually send us an outline for the electrical installations.**

Please send it by return mail to Richard Lesonitzky GmbH, 1180 Vienna, Lacknergasse 78 (at latest 3 days before the start of the installations for the exhibition).

**After receiving your order, you will get the invoice immediately. The invoice should be payed until 14 days before the event starts, so that we can guarantee your power supply.**

We point out that the contents of this letter also become object of our agreement.

Yours faithfully,

*Richard Lesonitzky GesmbH*

### Order Form 2021: Power Supply and Lighting

According to the „principle of public functions“ all supplies have to be installed to be switched off heteropolar. The main switch and the report result are a must. The offshored mains connections with heteropolar main switches and related possibility of supply (socket), booth-grounding, report result, and commission with the „Magistrat der Stadt Wien“ are part of the installation of the power supply. All materials are on loan including the installation and dismantling during the event. Costs for electricity: kWh € 0,90.
